Urban District of Windermere

ANNUAL REPORT

OF THE

Medical Officer of Health

FOR THE YEAR

1959

KENDAL

TITUS WILSON & SON, LTD.

1960

Kendal 1296.

Stricklandgate House,
P.O. Box 18,
Kendal.

*To the Chairman and Members of the Urban District Council of
Windermere.*

SIR, LADIES AND GENTLEMEN,

I have the honour to submit to you my Annual Report on the health of the Urban District for the year 1959.

I wish to acknowledge the help and ready co-operation of my colleague the County Medical Officer of Health, and also the assistance afforded to me by the local general medical practitioners.

I am indebted also to the Public Health Inspector and his staff for the spirit of teamwork which exists in my department, and for the fund of local knowledge which they have laid at my disposal.

I have the honour to be,

Sir, Ladies and Gentlemen,

Your obedient servant,

FRANK T. MADGE,

Medical Officer of Health.

NATURAL AND SOCIAL CONDITIONS OF THE DISTRICT.

Area of the Urban District in acres	9,723
Population (Registrar-General's mid year estimate)				6,420
Inhabited houses	2,258
Rateable Value	£108,974
Product of a Penny Rate	£420
Rate in the Pound levied	19/4d.
of which the County Rate was	12/7½d.

The Urban District of Windermere lies in a long narrow strip down the east side of the Troutbeck Valley and for four miles along the east bank of Windermere Lake. The District slopes steeply from a level of about 800 feet in the east down to the Lake which lies at about 130 feet above sea level. The slopes are well wooded and exquisite vistas of most of the Lake District are obtainable throughout.

The geology of the Urban District comprises in the southern half steeply dipping Kirkby Moor Flag in the Upper Ludlow Series of the Silurian System. In the northern half the rocks are Coniston Grits in the Wenlock Series of the Silurian System. At the extreme north in the Troutbeck Valley, there are thin beds of Taranon Shales, pale slates, Coniston Limestone, and then occur the Borrowdale Volcanic Series. There are occasional areas of glacial drift and some alluvial deposit in the valleys.

The climate is mild and equable. The valley bottoms are sheltered from the prevailing westerly winds, and the open aspect to the south-west provides full access to sunshine. Temperature gradient inversions are frequent at night but are soon dispelled in the morning. The rainfall varies between 70 and 75 inches a year, but this figure is due more to the heaviness of the rain when it comes rather than to an undue proportion of rainy days. Snow may be expected for one or two weeks in the late winter.

The District is mainly residential in character with a seasonal influx of holiday visitors to enjoy the amenities of the National Park. This influx raises the population to a peak of approximately 10,000. The outlying portions of the District are mainly agricultural and many of the small local industries are ancillary to agriculture. There are also the following industries which provide a certain amount of local employment and stability to the area to balance the fluctuating conditions in the holiday trade:—

Boatbuilding.	Machine Tool Manufactory.
Coffin Manufactory.	Laundry.
Cake Manufactory.	Motor Engineers.

The variety of these opportunities for local employment has, with emigration, kept Windermere happily free from unemployment. These industries, together with the trade associated with the hotels and boarding-houses, have provided that economic security and local prosperity which is a most important factor in the maintenance of the public health.

STAFF.

Name	Qualifications.	Office.	Whole or Part Time.	Other Offices.
Madge, F. T.	M.D., Ch.B., M.R.C.S., L.R.C.P., D.P.H.	Medical Officer of Health	Part	M.O.H. Combined County Districts of Westmorland
Shepherd, D.	F.A.P.H.I., F.F.S., Cert. S.I.B.	Public Health Inspector	Part	Additional Public Health Inspector, South Westmorland Rural District
Machell, B. M.	—	Clerk to Medical Officer of Health	Part	Clerk to M.O.H. Combined County Districts of Westmorland

Staff Changes.

There were no staff changes during the year.

COMMITTEES.

The Minister of Health requires me to include a list of your Council's committees which are concerned with matters of public health.

The Health Committee deal with the principal matters, but there are other aspects of public health importance which are dealt with by the Water and Housing Committees.

VITAL STATISTICS.

The following extracts are made from information supplied by the Registrar-General, with figures for 1958 for comparison.

Area of the District in acres 9,723

	1958	1959
Estimated civilian population (mid year) ..	6,370	6,420
Live Births. Legitimate— males	29	35
females	31	32
Illegitimate— males	1	2
females	1	2
Total	62	71
Crude Rate per 1,000 population	9.7	11.05
Corrected Rate per 1,000 population	10.3	11.8
Birth Rate for England and Wales	16.4	16.5
Illegitimate Birth Rate per 1,000 population31	.62
Illegitimate Birth Rate per 1,000 live births.	32.2	56.3
Still Births. Legitimate— males	1	—
females	—	3
Illegitimate— males	—	—
females	—	—
Total	1	3
Total (live and still) births ..	63	74
Rate per 1,000 total (live and still) births	15.8	40.5
Rate for England and Wales ..	21.6	20.7

	1958	1959
Deaths. males	34	38
females	49	57
Total	83	95
Crude Rate per 1,000 population ..	13.03	14.7
Corrected Rate per 1,000 population	9.9	10.7
Rate for England and Wales ..	11.7	11.6
Infantile Deaths (under 1 year)		
Total deaths under 1 year.. ..	2	2
Rate per 1,000 live births	32.2	28.1
Rate for England and Wales ..	22.5	22.0

Rate per 1,000 legitimate live births	33.3	30.0
Illegitimate	—	—
Rate per 1,000 illegitimate live births	—	—
Neonatal Deaths (under 4 weeks)		
Total neonatal deaths ..	1	2
Rate per 1,000 live births ..	16.1	28.1
Rate for England and Wales ..	16.2	15.8
Early Neonatal Deaths (under 1 week):		
Total early neonatal deaths ..	1	2
Rate per 1,000 live births ..	16.1	28.1
Perinatal Mortality Rate:		
Stillbirths and deaths under		
1 week.. .. .	2	5
Rate per 1,000 total (live and		
still) births	31.9	67.5
Maternal Mortality:		
Total Deaths	—	—
Rate per 1,000 total (live and		
still) births	—	—
Rate for England and Wales ..	0.43	0.38

Deaths from certain causes:—	1958.	1959.
Cancer	10	18
Measles	Nil	Nil
Whooping Cough	Nil	Nil

The main causes of death were:—		
Heart Disease	35
Cancer	18
Vascular lesions of nervous system	13

COMMENTARY ON THE VITAL STATISTICS.

Population.

Your population at the 1951 Census was 6,315 persons, comprising 2,708 males and 3,607 females, an increase of 3.8% since the 1931 Census. The Registrar-General’s current estimate of your civilian mid year resident population was 6,420.

The general indication is that your population is fairly stable, but a proper perspective cannot be obtained by considering merely one year’s changes. It is the general trend of population which is important for the planning of your future housing, water and sewerage requirements, and for the broader issues of the economic prosperity of your District.

You have not maintained your population by your own reproduction. You have relied upon the yearly immigration of people from other areas to keep up your numbers. That is why you have a predominantly elderly population. The 1951 Census showed that the nett immigration since 1931 amounted to more than twice your natural decline of excess of deaths over births.

The 1951 Census also showed a daily total flow of between 800 and 900 people across the urban district boundary. It is some measure of the dormitory use of Windermere. 455 persons go out of Windermere daily to work elsewhere, made up of 331 men and 124 women. Just about half of them go to Kendal, a quarter go into Lakes U.D. and the remainder to Lancashire and other foreign parts.

On the other hand nearly the same number of outsiders come into Windermere to work. 409 of them, comprising 284 men and 125 women. Lakes U.D. contribute 144, Lancashire 130, South Westmorland R.D. 68, and Kendal another 57.

The daily interchange of talent probably reflects to some extent the rigidity of housing policy, but no doubt offers a glimpse of wider horizons. The 1951 Census revealed anyway that only some 55% of the people of Westmorland were born in the County.

Birth Rate.

I have already referred to the continued low birth rate, now only two-thirds of the national rate. Apart from the local economic circumstances the effect of the two wars aggravated the position. If your native community is to survive you must raise your birth rate well above your death rate and to do that you will have to recapture and hold the faith of your young people in your local life. There are only just over half of them left now.

Still Birth Rate.

Your still birth rate was rather high, but not statistically significant.

Death Rate.

Your corrected death rate was slightly below the average for England and Wales, although the crude rate was much higher due to your elderly population.

Infantile and Neo-natal Deaths.

Infantile deaths are deaths in children under the age of one year, and included in this figure are the neo-natal deaths, which are deaths in children under the age of one month. There were two during the year.

Maternal Mortality.

There were no maternal deaths.

PREVALENCE AND CONTROL OF INFECTIOUS AND OTHER DISEASES.

Public Health Act, 1936. Sections 143-170.

National Health Service Act, 1946. Part III.

The general incidence of illness can be assessed by the weekly number of new claims for sickness benefit at our local National Insurance offices. A logarithmic graph of those figures shows a regular seasonal pattern over the years, and any variations are usually worth investigating.

1959 was quite a fortunate year. There were a few cases of mild dysentery at the end of January, a small outbreak of measles in a boarding-school, and very little else.

It is pleasing to record that the notification of infectious disease has much improved in recent years, and I am very grateful to my colleagues in general practice for their prompt help in this respect. I look upon the control of notifiable diseases as one of the most important duties of our department. Patterns of thought change from time to time on these subjects, but the notifications provide the factual basis for controlling the spread of infections.

NOTIFIABLE DISEASES TABLE.

DISEASE.	Total	Ages											Admitted to Hospital	Deaths
		-1	1-	2-	3-	4-	5-	10-	15-	20-	35-	45-

Dysentery	5	1	—	1	—	1	1	—	—	1	—	—	—	—
Scarlet Fever	1	—	—	—	—	—	1	—	—	—	—	—	—	—
TOTAL ..	17	1	—	2	2	2	3	6	—	1	—	—	—	—

TUBERCULOSIS.

Tuberculosis is the most important communicable disease of our time. Its prevention is primarily dependent upon social and economic factors in the general community, and secondarily upon the management of the established case. Your Council's functions are three-fold: to investigate the source of infection, to prevent the spread of infection, and to remove conditions favourable to infection.

The number of tuberculosis patients on the register at the year end were:—

Respiratory	...	25
Non-Respiratory	...	4
		—
		29
		—

TUBERCULOSIS TABLE.

Age Periods	NEW CASES				DEATHS			
	Respira- tory		Non-res- piratory		Respira- tory		Non-res- piratory	
	M	F	M	F	M	F	M	F
0 ..	—	—	—	—	—	—	—	—
1 ..	—	—	—	—	—	—	—	—
5 ..	—	—	—	—	—	—	—	—
15 ..	—	—	1	—	—	—	—	—
25 ..	—	—	—	—	—	—	—	—
35 ..	—	—	—	—	—	—	—	—
45 ..	—	—	—	—	—	—	—	—
55 ..	—	—	—	—	—	—	—	—
65 ..	—	—	—	—	—	—	—	—
Total ..	—	—	1	—	—	—	—	—

For the first time in recorded history there were no deaths from tuberculosis throughout the whole of Westmorland.

Hospital and Ambulance Arrangements for Infectious Diseases.

National Health Service Act, 1946. Parts II and III.

Hospital accommodation for infectious diseases is provided by the Regional Hospital Board, Manchester, at Beaumont Hospital, Lancaster, a modern and well-equipped building within easy reach of this area under modern transport conditions.

Smallpox cases will be admitted to the Ainsworth Smallpox Hospital near Bury.

Ambulance transport for cases of infectious diseases is provided by the Westmorland County Council and is based in Kendal.

Disinfection Arrangements.

Disinfection facilities for clothing and bedding are not very satisfactory owing to the lack of a steam disinfecter. It is, however, possible to obtain the service from neighbouring authorities.

Disinfection of premises and other chattels is carried out locally and presents no special problems.

HOUSING.

The Housing Acts.

Under the Housing Acts your Council has a duty to consider the general housing conditions in your District, to ascertain whether any are unfit for human habitation, and to assess the need for further houses. You have powers to deal with unfit houses, powers to provide new houses for all classes, and various powers and duties in the management of your Council's housing estates. Good housing conditions are an integral part of public health.

Present Housing Position.

The number of inhabited houses in your District is 2,258. With an estimated population of 6,420, the average number of persons per house is 2.8. This is not a high figure for a desirably sized family, but the 1951 Census showed that 259 houses had only one occupant, and another 614 houses had only two.

There appears to be little overcrowding within the strict definition of the Housing Act which assumes that living-rooms are used also for sleeping purposes, and that the sexes can be segregated irrespective of age, health or family relationships. At the time of the 1951 Census there were 1,977 private households living in 1,895 structurally separate dwellings.

It is probable that overcrowding is temporarily increased during the peak of the holiday season, but no certificates under Section 80 of the Housing Act, 1957, have been granted by your Council to authorise exceeding the permitted numbers.

General State of Houses.

The general state of the property in your District is good. A few of the older houses are in poor condition. These old houses suffer from rising dampness due to the absence of damp-proof courses which cannot be remedied without excessive work in under-pinning. The sound methods of the original construction have ensured that deterioration of the structure is a very slow process, but heavy repair costs and low rentals have made housing repairs unprofitable to the landlords. These sub-standard dwellings will in due course be dealt with under the Housing Act, but they are overwhelmingly outnumbered by the well maintained and sound property in your District.

General Progress of Slum Clearance and Improvements.

Westmorland as a whole has made very encouraging progress in post-war slum clearance despite all the difficulties of the times. Since the campaign was resumed in 1948 well over 900 houses in the County have been dealt with by formal action under the Housing Acts. Most of these will eventually be demolished or converted to trade use, but about 15% of them have been reprieved by their owners undertaking to spend considerable money for comprehensive reconditioning up to modern standards. In addition to these formal actions there have been a very creditable number of informal schemes for the renovation of sub-standard houses, either with the aid of improvement grants or entirely by private enterprise. The aim is to save a house wherever possible, but if it cannot be brought up to an acceptable standard of safety, decency and amenity the sooner it is swept away the better.

In your own District a modest start was made in slum clearance after the war and preliminary inspections were made for future actions. The problem is not a very difficult one in Windermere and I think good progress can be made in pruning out and tidying up the decayed properties.

On the Calgarth estate there were 34 houses still occupied at the year end, 30 of them were Government owned. I hope that the removal of people from these very sub-standard huts will be hastened.

The Housing Repairs and Rents Act, 1954, required your Council

to declare their proposals for dealing with sub-standard houses. You resolved to deal with the estimated 40 unfit houses within the next five years. The Ministry of Housing and Local Government approved the proposals, and they are now on deposit for public inspection.

Closing Orders.

Housing Act, 1957. Section 18.

No closing orders were made during the year. There were 10 closing orders on the register of local land charges at the year end.

One closing order was revoked when the house was satisfactorily renovated during the year.

Undertakings not to use for Human Habitation.

Housing Act, 1957. Section 16.

No such formal undertakings were accepted during the year leaving 4 undertakings on the register of local land charges at the year end.

Undertakings to Repair.

Housing Act, 1957. Section 16.

There were none during the year and none outstanding.

Improvement Grants.

House Purchase and Housing Act, 1959.

Your Council decided to stop making discretionary grants. In previous years such grants were a useful means of saving and improving sub-standard houses.

During the year seven standard grants were made for the improvement of houses.

Demolition Orders.

Housing Act, 1957. Section 17.

No demolition orders were made during the year. Five orders remain outstanding on the Register of Local Land Charges.

Clearance Areas.

Housing Act, 1957. Section 42.

No clearance areas were made during the year.

One confirmed clearance area consisting of three houses at Bowness Bank were all still occupied. They have been on the Register of Local Land Charges since 1955 and your Council are under a legal obligation to rehouse the occupiers. This is getting well overdue.

The other clearance area confirmed in 1955 comprised five houses at Woodside. During the year these were in process of a long drawn out attempt to pull them down, involving much physical danger to a lot of people. The sooner the job is completed the better.

Estimated Requirement for New Houses.

Housing Act, 1957. Section 91.

In conjunction with your Building Surveyor I estimate that about 200 houses are required to meet the needs of those without a separate house, those in sub-standard houses, and the families to be rehoused from the Calgarth hutments.

At the year end there were 233 applicants on your Council's waiting list for rehousing.

Housing Building Progress.

No Council house building was in progress at the year end, due to the withdrawal of general subsidies by the Exchequer.

Since the end of the 1939-45 War, 286 houses and flats have been built by your Council, and 115 by private enterprise. 21 of the latter were completed during the year and another 22 were under construction at the end of December.

During the year there were also 10 extra dwellings provided by private enterprise conversion of existing buildings, bringing the post-war total to 109.

Tenants Selection.

The present method of selecting tenants for your Council houses is for your Housing Sub-Committee to consider all the applications and then select the tenants whom they consider are most in need of being rehoused. No points system is in operation and there is no anonymity.

Housing Management.

Your Council now own 366 permanent dwellings. Routine repairs and maintenance are carried out partly by direct labour and partly by local contractors. Rents vary from 7/- to 23/- per week, exclusive of rates, and the rateable values of the Council houses are between £16 and £28.

The examination of rentals and rates may not seem at first to have much to do with public health, but it does have considerable significance. It is not unknown for persons who have been rehoused from poor quarters into modern Council houses to have to pay their rents and rates from the portion of their income which rightly belongs to the purchase of food. Domestic economy can affect the general standard of the public health almost as much as environmental conditions, and some attempt must be made to maintain a balance between these conflicting factors.

Verminous Houses.

Public Health Act, 1936. Section 83-85.

No action was necessary during the year.

Nuisances and Notices re Dwellings.

Public Health Act, 1936. Sections 91-100.

During the year the following action was taken:—

Informal Notices served	...	34
Statutory Notices served	...	0

In no case was it necessary to obtain an Abatement Order from the Court. There was a general desire on the part of owners to remedy the defects.

Certificates of Disrepair.

Rent Act, 1957.

There was one application for a certificate, one proposal to issue such certificate was served, and one undertaking to carry out the works was accepted by your Council. No certificates were served on owners.

Dangerous Buildings.

Public Health Act, 1936. Section 58.

One formal notice was served during the year for part of the demolition at Woodside. It was complied with.

Parks and Open Spaces.

Your Council has extensive parks and open spaces both around the Lake and on the surrounding heights. These form a very valuable amenity for the elderly and those who for various reasons enjoy leisurely contemplation of the mountains.

Bathing Facilities.

A portion of Windermere Lake is marked off by stakes at Miller-ground. The bathing is safe from physical dangers and from any serious contamination as lake water flows naturally through the pool at all times. During 1955 I drew your Council's attention to the undesirability of visitors to Millerground drinking from Wynlass Beck which receives sewage effluents, and the cemetery drainage, not far upstream. I recommended warning notices and the provision of a water tap from the public main. I am also not satisfied with the drainage from certain premises in that area. Luckily the polluting sources are some distance

from the bathing-pool. Indiscriminate excretion on the adjoining land presents difficulty from time to time, but the renewed interest taken in the Swimming Club has led to a very welcome improvement in the general hygiene of the site.

Tents, Vans, Sheds and Moveable Dwellings.

Public Health Act, 1936. Sections 268-269.

One licensed camping site was on the Register at the end of the year. No action was taken during the year. Your Council imposes conditions upon the grant of licences and requires their annual renewal. As this District is within the National Park it is most desirable that strict but unobtrusive supervision should be exercised over camping sites to ensure that the natural beauty of the country is not despoiled by the careless few.

Unlicensed camping sites are scattered throughout the District but very little nuisance arises from casual campers. The improvised sanitary arrangements and refuse disposal cause little trouble, but the campers take water from polluted becks at their own risk.

Two unlicensed camping sites which cater mostly for tents are increasing rapidly in size and have caused much local complaint. Both are within your District on the Patterdale Road. Better control is needed to minimise the risks to health of both the campers and the surrounding population.

One individual camping licence was in force at the year end.

WATER SUPPLIES.

Water Act, 1945.

My earlier Annual Reports provided a very detailed account of the historical, geographical, geological and technical features of your two sources of public water supply at Dubbs and Ghyll Head. This year's report will be limited to progress records.

The public water supply is potentially adequate in quantity and now very satisfactory in quality. The results of laboratory examinations of the water samples taken during the year are set out in Appendix "A". Regular sampling of both raw and treated waters is carried out.

Droughts place a great strain upon the supplies, and water shortage at the height of the tourist season can be very embarrassing. The annual rainfall is more than adequate, and the problem resolves itself into either increasing storage at the elevation which can be secured at Dubbs and Borrans, or by remedying the waste of water in the

distribution system, by developing a new source, or by drawing an increased amount from the Thirlmere aqueduct. The shadow of amalgamation into a larger water board area lies over your undertaking.

Dubbs Supply.

The sanitary arrangements at the annual sheep dog trials held on your gathering ground were under my personal supervision during the year.

The installation of the chlorinator at Dubbs has removed many of the previous difficulties of safeguarding that supply. The recent sample results have been excellent.

Ghyll Head Supply.

The condition of the headworks has deteriorated. Negotiations for acquisition of the gathering ground have been in progress for very many years. On the whole Ghyll Head is not a very desirable source of supply, although by filtration, alkalisation, and chlorination it is made usable. I would prefer to see its abandonment if a less troublesome and risky source could be found.

In conclusion, I have to advise your Council that the other recommendations contained in Memorandum 221 of the Ministry of Health should be constantly observed. Your Council has a double responsibility of supplying pure water as undertakers, and of safeguarding the health of your population as a Sanitary Authority.

The Water Engineer informs me that the number of houses connected to the public supply is about 2,161, which leaves 106 reliant upon private supplies. There are stated to be no houses supplied from standpipes.

I have no official knowledge of the quantity of the private water supplies, but I suspect that the quality of the average supply fluctuates widely and I can do no more than warn the users that they drink it at their own risk, that they should have it tested for purity at regular intervals and that if in doubt they should boil it.

General Provision of Baths and Sinks.

The 1951 Census showed that your District held 1,977 households, of which 510, or about a quarter had no fixed bath, 32 of them had no kitchen sink. I hope that the introduction of standard grants will go some way towards remedy of this need.

SEWERAGE.

Public Health Act, 1936. Sections 14-15.

The greater part of your District is provided with public sewerage which was installed or relaid during the last 50 years.

Sewage has to be pumped to Tower Wood at two points in the system. The first pump is situated at Calgarth and the second at Bowness Bay. There are storm water overflows in connection with each of these plants for the excess to pass directly into the Lake. The dry weather flow of sewage received at Tower Wood was estimated to be 600,000 gallons per day, which is a high figure for the population served by the sewerage system, and suggests considerable infiltration water. As prolonged dry weather is not common in your District, the normal working level of the flow under average climatic conditions is between 1,000,000 and 1,500,000 gallons per day, which is rather a dilute sewage.

The general provision of plant is satisfactory for producing a good effluent. The load on the works could be reduced considerably if infiltration water could be diverted.

The majority of the houses which are not in the sewage area use cesspools and septic tanks. A few pail-closets still exist in some of the older property, and a few privies and privy-middens are in use in the outlying parts of the District. The 1951 Census showed that 52 households were without water-closets, and a further 129 shared one. There were no conversions to water-closets during the year.

Public Conveniences.

Public Health Act, 1936. Section 72.

Public conveniences are sited at Bowness Bay, Pinfold, New Road, Broad Street, Queen's Park and Glebe Road.

PUBLIC CLEANSING.

Refuse Collection.

Public Health Act, 1936. Section 72.

Domestic refuse is collected from the whole of your District with the exception of a few detached and isolated dwellings. Your Council's own vehicles and staff are used for this work.

Refuse Disposal.

Public Health Act, 1936. Section 76.

Your Council opened their present tip at Lindeth in 1957 and undertook to carry out fully-controlled tipping to the standards laid

down by the Ministry of Health. That promise will require the expenditure of sufficient money to provide adequate labour on the site and a proper amount of covering material. Otherwise nuisances and public risks will be created.

Street Cleansing.

Public Health Act, 1936. Section 77.

This work is undertaken by the Highways Department and the streets are well maintained.

FOOD AND DRUGS.

General Powers.

Food and Drugs Act, 1955.

Your Council bear most of the statutory responsibility for safeguarding the public from foodborne diseases. The main aim is directed towards securing proper and hygienic conditions for the manufacture, preparation and sale of food. The secondary aim is to trace and localise any outbreaks of disease which may occur in spite of preventive measures.

Precautions against Contamination.

Food and Drugs Act, 1955.

Food Hygiene Regulations, 1955.

Food hygiene is steadily improving throughout your area. Public opinion is well ahead of the law and most traders are aware of the fact. The good food trader does not need official instruction in basic cleanliness or in the enforcement of legal minimum standards. He may welcome advice on technical problems, but his aim is how high he can get, not how low he can get away with.

The responsibility for safe food does not rest entirely with the trader, as the housewife must play her part as well. Quite a lot of strange things happen to food between the shop counter and the dinner plate, and the educational campaign has had to be carried into the home. Foodborne diseases, mild dysenteries and attacks of diarrhoea and vomiting are not infrequent in our homes and among our visitors. I am confident that higher standards will reduce these preventable diseases.

Food Poisoning Outbreak.

Ministry of Health Memo. 188/Med.

There was a severe outbreak of food poisoning in one of the hotels in your District during Christmas week. About 100 people were suddenly taken ill with diarrhoea and vomiting, but recovered after 24 to 36 hours. There were no fatal cases. The germ responsible was staphylococcus pyogenes, the kind in septic sores, and it is believed that it multiplied in cream and whipped-cream products. The seasonal difficulties of delivering fresh cream over the holiday weekend for the peak demand caused a larger bulk stock to be held at the hotel and consequent extension of its period of use outside the refrigerator. The Hotel Company and management afforded me every courtesy and facility in my duty of checking the further spread of infection.

Ice-Cream Trade.

Food and Drugs Act, 1955. Section 16.

Ice-Cream (Heat Treatment, etc.) Regulations, 1947.

The following premises were registered:—

Manufacture by hot mix, cold mix, storage and sale	...	3
Manufacture by cold mix, storage and sale	1
Storage and sale only	42

Prepared Meats.

Food and Drugs Act, 1955. Section 16.

The number of premises on the Register for the preparation of sausages, potted meat, preserved meat, pressed meat and pickled food was 16 at the year end. No particular difficulties have been encountered in these trades.

MILK.

Registration of Milk Distributors.

Milk and Dairies Regulations, 1959.

Total number of registered distributors on register ... 21

With the classification of Windermere as a specified area, the retail distribution is solely by bottled designated milk, except in the case of the larger establishments, where milk is delivered in larger sealed containers. This has got rid of, once and for all, the old fashioned loose method of delivery, with all its drawbacks and unhygienic complications.

Registration of Dairies which are not Dairy Farms.

Milk and Dairies Regulations, 1959.

Total number of registered dairies	1
------------------------------------	-----	-----	-----	---

Cleanliness of Milk.

Food and Drugs Act, 1955.

No samples were taken during the year.

Pathogenic Organisms in Milk.

Food and Drugs Act, 1955.

No samples were taken for biological test. With the eradication of bovine tuberculosis, it seems likely that the next milkborne disease to be tackled may be brucellosis. I believe that many human cases go unrecognised.

It was not necessary to stop any milk supply or restrict the activities of any milk handlers under the Milk and Dairies Regulations on account of infectious disease.

Specified Areas.

The Milk (Special Designations) (Specified Area) (No. 2) Order, 1958, came into force on the 1st October, 1958, and includes the Urban District of Windermere. In the specified area it is illegal for any person to sell by retail for human consumption any milk other than milk which may be sold as specially designated milk in accordance with the provisions of the Milk (Special Designation) (Raw Milk) Regulations, 1949-1954, or the Milk (Special Designation) (Pasteurised and Sterilised Milk) Regulations, 1949-1953, and all retailers selling milk in the areas specified (whether or not their premises are situated in any such area) will need to be licensed by the appropriate licensing authority to use a special designation in relation to milk.

Designated Milks.

Milk (Special Designations) Regulations.

Your District Council is responsible for the granting of dealers' and supplementary annual licences for the sale of Tuberculin Tested Milk. 23 licences were in force during the year, and 5 Pasteurised Milk dealers' licences.

Condemnation of Meat.

Food and Drugs Act, 1955.

All slaughtering is carried out at the Kendal Abattoir where the meat is inspected by the Borough Inspectors. 215 lbs. were condemned during distribution within your District on account of subsequent bone taint.

Condemnation of Other Foods.

Food and Drugs Act, 1955.

The following foodstuffs were condemned by your Inspector during the year:—

About $3\frac{1}{2}$ cwts. of assorted foods, about $1\frac{1}{2}$ tons of potatoes and some meat in retail shops.

Method of Disposal of Condemned Food.

The Minister of Health requires me to describe the current methods for the disposal of condemned food. In this District it is buried at the Council's refuse tips.

GENERAL INSPECTIONS.

From 1st April, 1956, the major revision of your Council's staff split the longstanding combined appointment of Engineer and Surveyor with Public Health Inspector. The new arrangement provides for the sharing of a Public Health Inspector with the neighbouring Rural District of South Westmorand.

Mr. Shepherd devotes four sessions per week, made up of two whole days, to his Public Health Inspection duties at Windermere. The arrangement seems to be working very well in practice, 387 inspections were carried out during the year.

Offensive Trades.

Public Health Act, 1936. Section 107.

There are no offensive trades in the District.

Factories.

Factories Act, 1937.

There are 53 factories on the Register. 37 inspections were made. One written notice was issued and no prosecutions were required.

No references were made to H.M. Inspector of Factories, but one was received from him concerning defective sanitary accommodation.

Inspections.

Premises.	Number of Premises.	Number of		
		Inspec- tions.	Written Notices.	Occupiers prosecuted.
Factories in which Sections 1, 2, 3, 4 and 6 are to be en- forced by Local Authorities ..	6	4	—	—
Factories not included in (1), in which Section 7 is enforced by Local Authority	47	33	1	—
Other premises in which Sec- tion 7 is enforced by the Local Authority (excluding out- workers' premises)	—	—	—	—

(b) Unsuitable or defective	I	I	—	I	—
(c) Not separate for sexes	—	—	—	—	—
Other offences against the Act (not including offences relating to Out-work)	—	—	—	—	—
Total	I	I	—	I	—

No lists of outworkers were supplied to your Council by factory owners, and I have no official knowledge of any cases of default in this respect.

There are no basement bakehouses in the District. No certificates of the means of escape from factories in case of fire were issued during the year.

H.M. Inspector of Factories has been given details of your Urban District's administration of the relevant sections of Parts I and VIII of the Factories Act, 1937.

Shops Act, 1950.

41 visits were made under the Shops Act for the supervision of sanitary accommodation, washing facilities, and the maintenance of suitable temperatures.

Common Lodging Houses.

Public Health Act, 1936. Part IX.

There are no registered common lodging houses in the area.

Rent Restriction Acts.

No action was taken during the year under the Rent and Mortgage Interest Restriction Acts, and no contraventions regarding rent book entries were encountered.

Smoke Abatement.

Public Health Act, 1936. Sections 101-106.

No notices were served during the year to abate smoke nuisances.

Compulsory Removals.

National Assistance Acts, 1948-1951.

One Court Order was obtained for the compulsory removal to hospital of an old lady who lived alone and became very ill, without anyone to look after her. Although she would not consent to go into hospital voluntarily she accepted the decision calmly. Unfortunately it was too late to do more than make her end comfortable. She died next day.

Two other cases were under observation throughout the year, but voluntary efforts have succeeded in putting off any formal action.

Such cases are extremely distressing to deal with, and the course of compulsory removal is reserved to meet the emergencies of a last resort when all other methods of help have failed. Sometimes it is very hard to decide what is really in the best interests of the patient.

Laboratory Services.

National Health Service Act, 1946. Section 17.

The Laboratory attached to Westmorland County Hospital in Kendal provided many of the necessary examinations of material obtained by the Department. The laboratory has given extremely valuable service to the southern part of the County.

Most of the public health investigations are in process of being transferred to the Public Health Laboratory Services at Preston and Carlisle to relieve the burden on the hospital laboratories.

Public Mortuary and Post-mortem Room.

Public Health Act, 1936. Section 198.

Your Council have long provided a public mortuary and post-mortem room at Windermere, but post-mortem examinations have not been done there for many years on account of a lack of modern facilities. The premises are now kept solely as a public mortuary. During the year I made recommendations to your Council for its better control.

Byelaws.

Byelaws on public health matters are in force for:—

Building.

Nuisances.

Burial Grounds.

Slaughterhouses.

Common-Lodging Houses.

Pleasure Grounds.

Food handling.

New Legislation.

The Slaughterhouse (Hygiene) Regulations, 1958, became operative on 1st January, 1959.

The Slaughter of Animals (Prevention of Cruelty) Regulations, 1958, became operative on 1st January, 1959.

The Milk and Dairies (General) Regulations, 1959.

The House Purchase and Housing Act, 1959.

The Housing (Underground Rooms) Act, 1959.
